

NOTAM Express™

AvFinity® stands out from aviation's status quo by adding value to airlines' data communications

AvFinity's NOTAM Express™ now provides World Wide NOTAMs including hard to find small-field Canadian NOTAMs directly from NAV CANADA. AvFinity offers many options for receiving the most up to date NOTAMs available. All this through AvFinity's Direct Connections to NOTAM Centers and attractive pricing, which replaces costly legacy network technology that results in varying monthly character costs. Available NOTAM types include:

F: FDCNOTAM --Flight Data Center NOTAMS are NOTAMs that are regulatory in nature such as changes to an instrument approach procedure or airway. Temporary Flight Restrictions (TFRs) are also issued as FDC NOTAMs.

D: DOMNOTAM --NOTAMs that are primarily distributed within the United States although they may also be available in Canada. Domestic NOTAMs stored in the USNS are coded in a domestic format rather than an ICAO format.

M: MILNOTAM -- Any NOTAM that is part of the military NOTAM system which primarily includes NOTAMs on military airports and military airspace.

I: INTNOTAM -- Any NOTAM intended for distribution to more than one country would be considered an international NOTAM being NOTAMs stored in ICAO format in the United States NOTAM System (USNS) or published in the International NOTAMs section of the NTAP.

L: LOCAL NOTAM (military and domestic) -- A NOTAM given local dissemination by voice and other means, such as telautograph and telephone, to satisfy local user requirements. (This type of NOTAM is now used only in the military NOTAM system.)

Canadian Small-field NOTAMS – NOTAMs for small fields located in Canada that are not available through the Aeronautical Information Data Access Portal (AIDAP).
